HealthCare

"I developed a health-related website that utilizes HTML, CSS and JavaScript to provide users with an interactive and user-friendly experience. The website features various health related articles, tips, and resources for users to access and navigate easily. I also implemented responsive design to ensure optimal viewing on all devices."

Telegram Crypto Bot

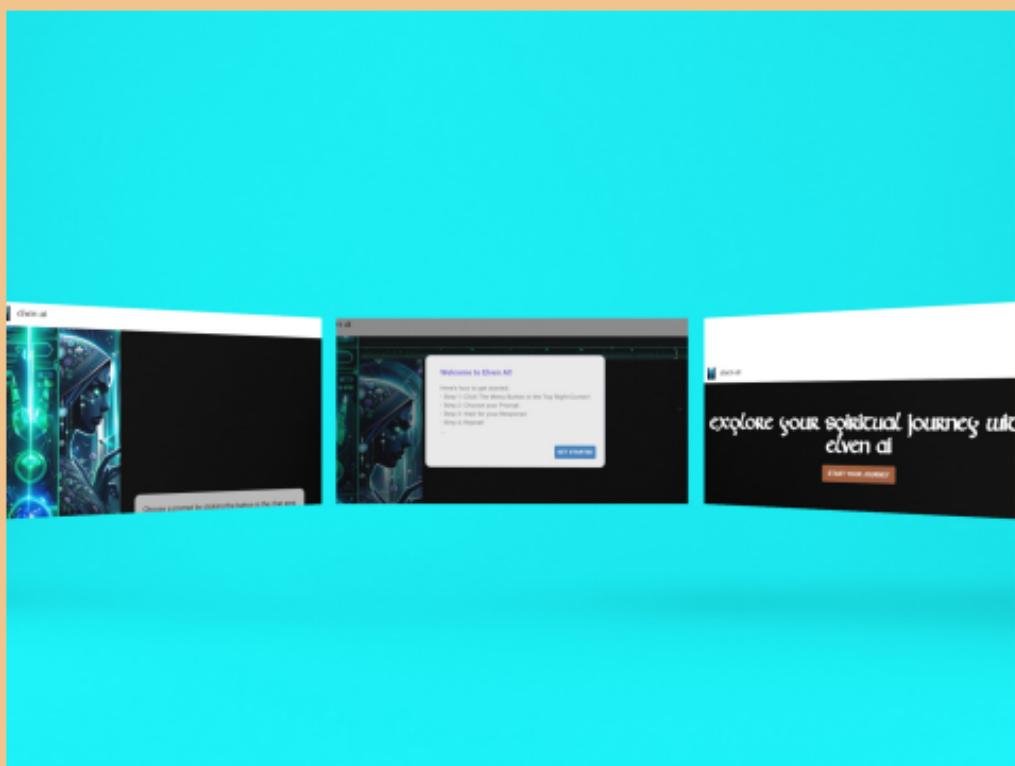

<https://t.me/ChainBrainCryptoBot>

"Introducing ChainBrainCryptoBot: Your Smart Solution for Auto Crypto Trading

In the dynamic world of cryptocurrency, ChainBrainCryptoBot emerges as your ultimate trading companion, engineered to navigate the complexities of the market with unparalleled precision. This state-of-the-art automated trading bot harnesses the power of advanced AI algorithms to deliver a seamless and highly effective trading experience."

ElvenAI Spiritual ChatBot

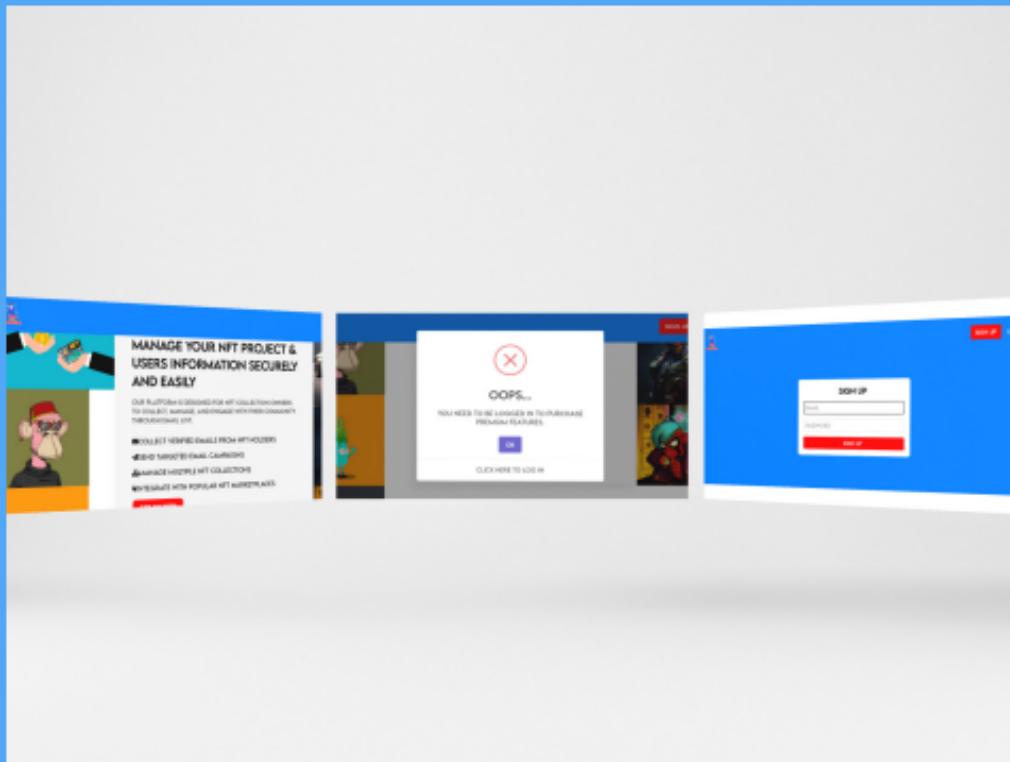

<https://ai.elvenenchantments.art>

Tech Stack: React/Flask(Python) | MongoDB

Elven AI was created with the mission to bring spiritual insight and guidance to the modern world through the power of artificial intelligence. Our journey began with a vision to merge ancient wisdom with cutting-edge technology, offering a unique platform for self-discovery and personal growth.

NFT Collection Manager

<https://nftcollectx.pro>

Tech Stack: React/Flask(Python) | MongoDB

NFTCollectX is an innovative and secure platform designed specifically for NFT collection owners. It revolutionizes the way NFT creators and owners interact with their communities by providing a suite of tools for efficient email list management and community engagement. Our platform is tailored to the unique needs of the NFT space, offering seamless integration with NFT marketplaces and a user-friendly interface to manage multiple NFT collections.

Career Portfolio

Link: <https://ecbjrthreejs.netlify.app/>

Tech Stack: NextJS/Vite | WebGL

"Uses Three.js Javascript Library to create a 3D Portfolio Website, it also features WebGL and a Scrolling Animation. Uses CSS Grid for the main Content. The avatar image is a 3D Cube that rotates as we scroll down along with a huge 3D Ring that rotates continuously. There's a rotating moon animation as well as some stars throughout."

Entertainment

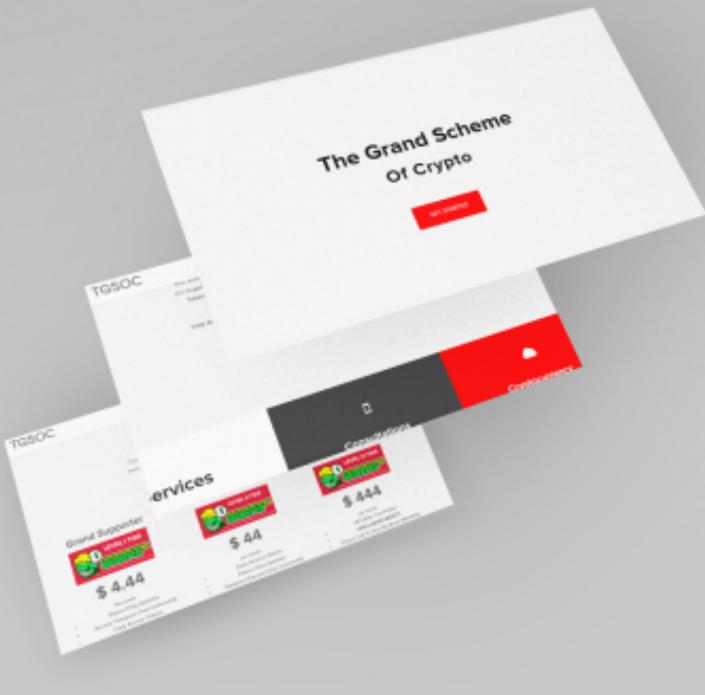

Client: @realhazellove
Tech Stack: HTML5/CSS/JS

"A visually-stunning entertainment website and portfolio for a music artist/singer using HTML, CSS, and JavaScript. It features an interactive design and showcases the artist's music, videos, tour dates, and photo gallery in an easy-to-navigate format, providing their fans with an immersive experience. It is fully responsive, optimized for all devices, and easy to use."

Web3 Consultant Agency - UI

Company: TGSOC

" I recently worked on a blockchain consulting and media website that specializes in helping organizations and individuals integrate emerging technology. The website features a clean and modern design with a focus on user experience. It was built using HTML/CSS and JavaScript and includes features such as responsive design, interactive elements and a clear call-to-action for services. The website also provides a platform for blockchain news, events and analysis. It serves as a one-stop-shop for businesses and individuals looking to stay informed and stay ahead in the ever-evolving world of blockchain technology."

Blockchain - Landing Page

Company: TGSOC

"I developed a coming soon landing page for a Blockchain Consulting and media company that specializes in helping organizations and individuals integrate emerging technology. The website features a clean, modern design utilizing HTML, CSS and JavaScript. The page includes an email sign-up form for users to stay updated on the company's launch, as well as information about the company's services and an introduction to the team.

The website is fully responsive and optimized for all devices. The landing page is a great way to generate excitement and build anticipation for the company's official launch."

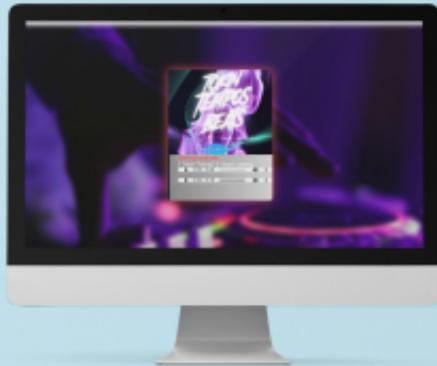

eSports

"An esports website that features an engaging and interactive user interface utilizing HTML, CSS, and Javascript. The website offers tournament information, live scores, and player statistics for popular esports games. Additionally, it includes a forum for the esports community to discuss strategy and connect with one another. The website is optimized for both desktop and mobile devices, ensuring a seamless experience for users. Overall, the website provides a comprehensive and engaging destination for esports enthusiasts."

NFT Project Landing Page

Company: TGSOC

"I developed a cutting-edge music NFT project website that utilizes AI technology to create unique and generative beats. The website is built using HTML, CSS, and Javascript, and features an easy-to-use interface for browsing and purchasing music NFTs. The site will also allow users to create their own generative music using AI, and provides tools for composers and artists to showcase their work. The website has a sleek and modern design that is optimized for both desktop and mobile devices. Overall, it offers a unique and engaging experience for music fans and creators alike."

NFT Project Landing Page

Company: TGSOC

"Developed user-friendly and visually appealing website for an NFT Project ecosystem which aims to provide entertainment and awareness for Cronos Community users. The website is built using HTML, CSS, and Javascript, and features a clean and modern design. Additionally, the website also includes an NFT marketplace that allows users to purchase and trade unique digital assets. Overall, the website serves as a valuable resource for the Cronos community, promoting education and adoption of blockchain technology."

Education / Blockchain

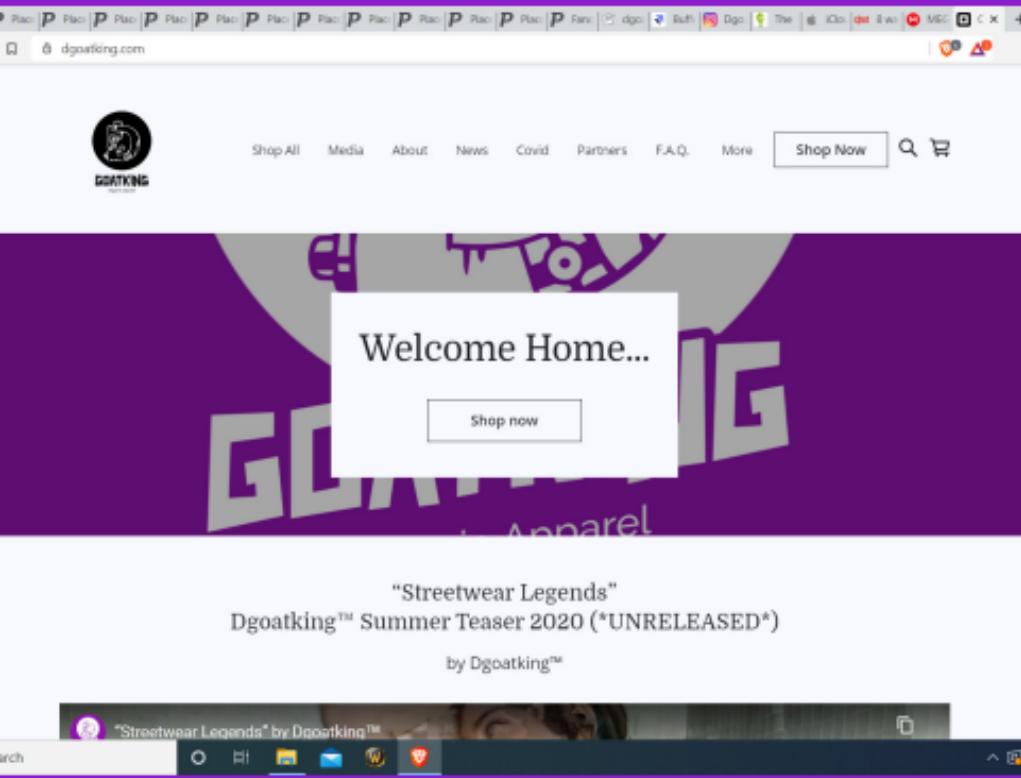

Company: TGSOC

<https://croclass.netlify.app/>

"developed a user-friendly and visually appealing website for an NFT Project ecosystem which aims to provide crypto education and awareness for Cronos community users. The website is built using HTML, CSS, and Javascript, and features a clean and modern design. It includes a variety of educational resources such as articles, tutorials, and videos, that help users understand the basics of blockchain technology and how to navigate the Cronos ecosystem."

E-Commerce Website

"I developed a sleek and user-friendly e-commerce website for a client in the urban streetwear industry. The website features HTML/CSS and Javascript, with a custom design that showcases the brand's unique style. The site is fully functional, with features such as a shopping cart, product pages, and a secure checkout process."

Decentralized App (Dapp)

Company: TGSOC

<https://crobadge.netlify.app/>

"A decentralized web application using ReactJS, NodeJS, Web3.js, and Ethers.js that allows users to mint and utilize Non-Fungible Tokens (NFTs) in various ways. The application also utilizes smart contracts to ensure security and transparency for all transactions. My experience in Javascript and blockchain technology helped me to create an intuitive and user-friendly experience for the community members to mint and utilize their NFTs."

Transportation

G2L TRANSPORT & RIDESHARE LLC

Eugene B

A Seasoned Web Developer with experience to match, Eugene Has been developing Projects on the Web since 2013. He has intermediate knowledge and skills in Front-End Web development and Is currently focused on Blockchain Development.

[Hire Me](#)

A thumbnail for a blog post titled "INSTALL GOOGLE CHROME". It features a close-up image of a person's hands holding a smartphone with a colorful screen. The post has a timestamp of "01-Jan-2022", categories "Web Design", and 15 comments. A "Read More" button is visible.

Keyboard Shortcuts for New Programmers

I recently developed a developer blog that utilizes HTML, CSS and JavaScript to create a clean and visually appealing user interface. The blog features articles and tutorials on various web development topics such as front-end development, web design, and emerging technologies like blockchain and NFTs. It also includes a search bar and a responsive design to make it easy for users to find the information they need. The blog is regularly updated with new content and I also maintain it by handling bugs and ensuring optimal performance.

API'S AND INTEGRATIONS

```
async function connectWallet() {
  if (window.ethereum) {
    try {
      // Request account access if needed
      await window.ethereum.request({ method: 'eth_requestAccounts' });

      // Now you can use the Web3 instance to interact with the blockchain
      console.log('Connected', web3);
    } catch (error) {
      console.error('User denied account access or there was an error', error);
    }
  } else {
    console.error('Non-Ethereum browser detected. You should consider trying MetaMask!');
  }
}
```

FAVORITE PIECES OF CODE

```
function addIPFSPproxy(ipfsHash) {  
  const URL = "https://idm.infura-ipfs.io/ipfs/"  
  const hash = ipfsHash.replace(/^ipfs?:\/\//, '')  
  const ipfsURL = URL + hash  
  
  //console.log(ipfsURL)  
  return ipfsURL  
}
```

FAVORITE PIECES OF CODE

[HTTPS://GITHUB.COM/COOKS-OF-CRONOS/NFT-MARKETPLACE-OG](https://github.com/cooks-of-cronos/nft-marketplace-og)

```
import Web3EthContract, { Contract } from "web3-eth-contract";
const contract = new Web3EthContract(ABI, NFTCONTRACT);
totalNFTs = await contract.methods.balanceOf(address).call();
```
